

Doubles Go 'Round

Doubles & Doubles + 1 Interactive Math Craft

Doubles Go 'Round Teacher Guide

Interactive Doubles & Doubles + 1 Ferris Wheel

You Will Need:

Student Ferris Wheel page

Ferris wheel base

Scissors

Glue

Crayons/colored pencils

Brass fastener

Directions:

- **Complete the math.**
Students begin with a doubles fact and write it in one of the **Doubles** cars.
- **Make a Doubles + 1 fact.**
Students change **one addend by 1** and record the new equation in a neighboring **Doubles + 1** car.
- **Repeat.**
Students choose a second doubles fact and repeat the process in the remaining two cars.
- **Color and cut.**
Students color their Ferris wheel and base, then carefully cut out both pieces.
- **Assemble the ride.**
Place the Ferris wheel on top of the base, lining up the center of the wheel with the hole at the top of the base. *Students can glue the base to colored construction paper, then attach the Ferris Wheel for durability.
- **Make it spin!**
Ride the Doubles Ferris Wheel!
Students can spin their Ferris wheel and use the cars to practice explaining how a **doubles fact** helps them solve a **doubles + 1 fact**.

Teacher Tip

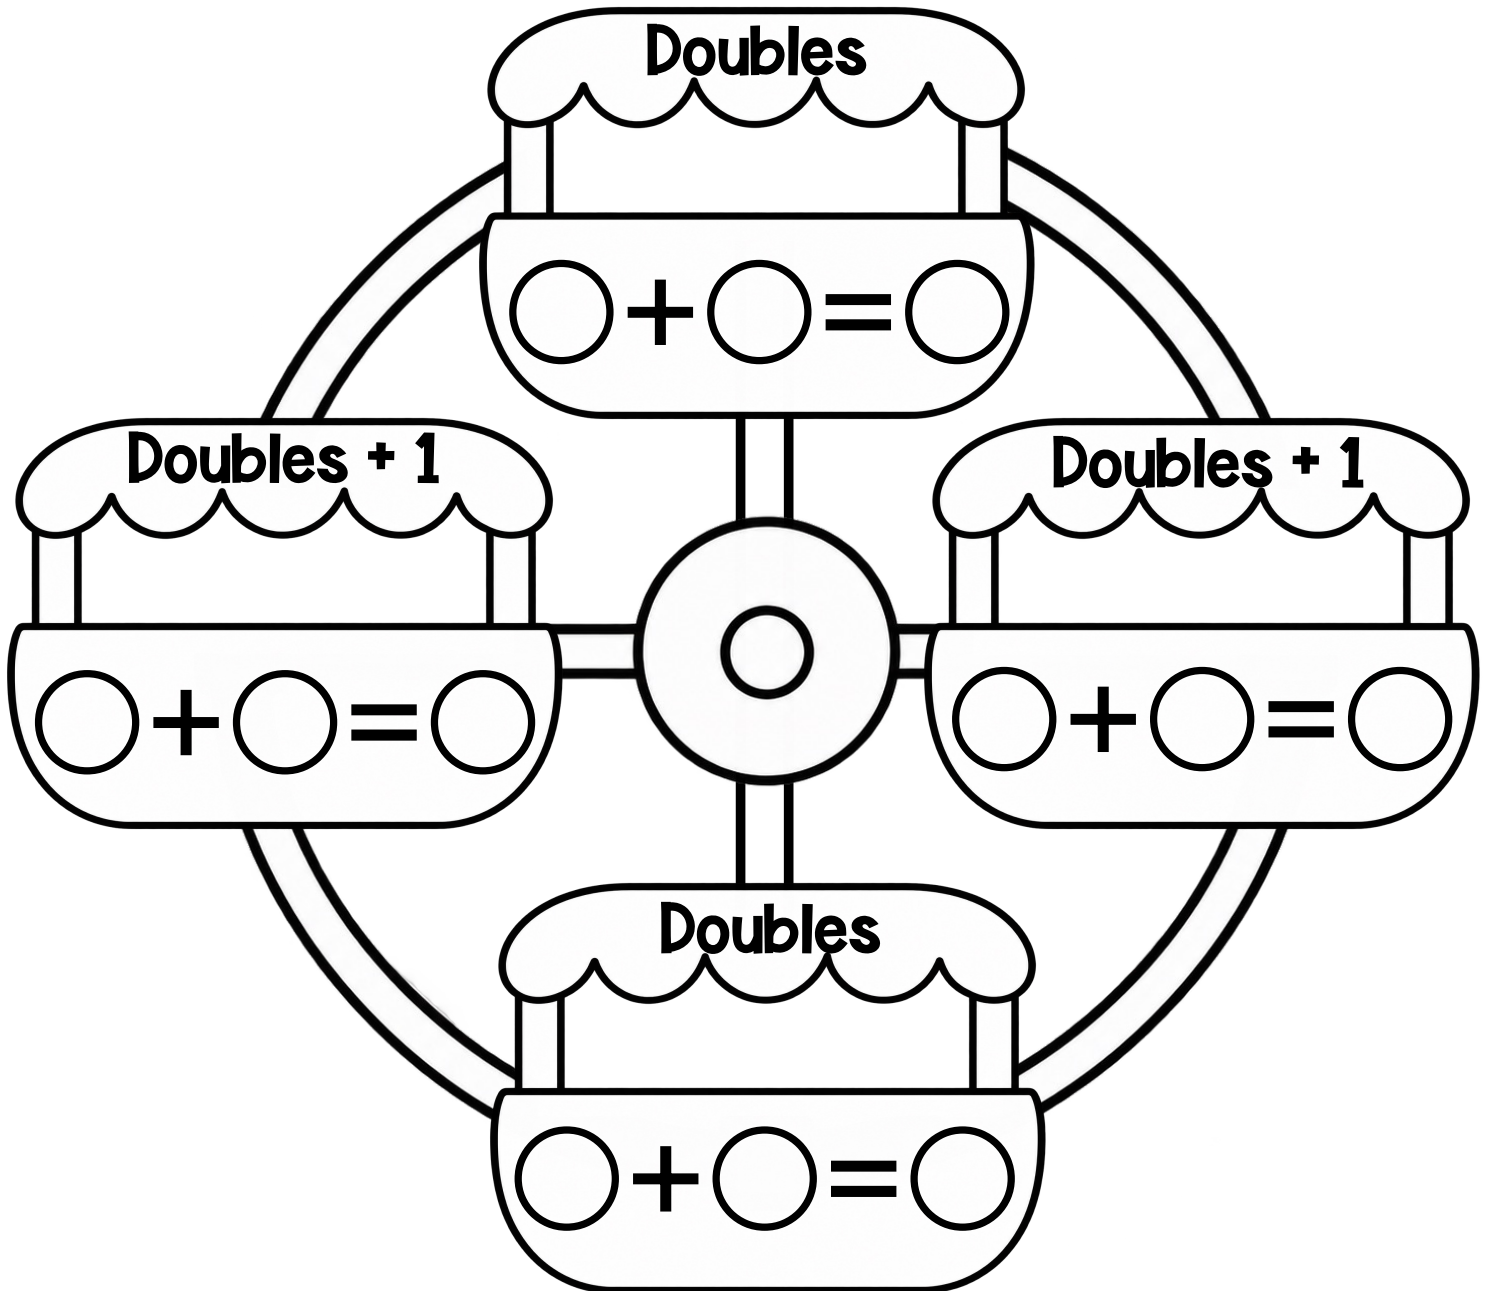

Before students begin, model one pair together:

$$4 + 4 = 8 \rightarrow 4 + 5 = 9$$

Point out that **one addend increased by 1**, so the **sum also increased by 1**.

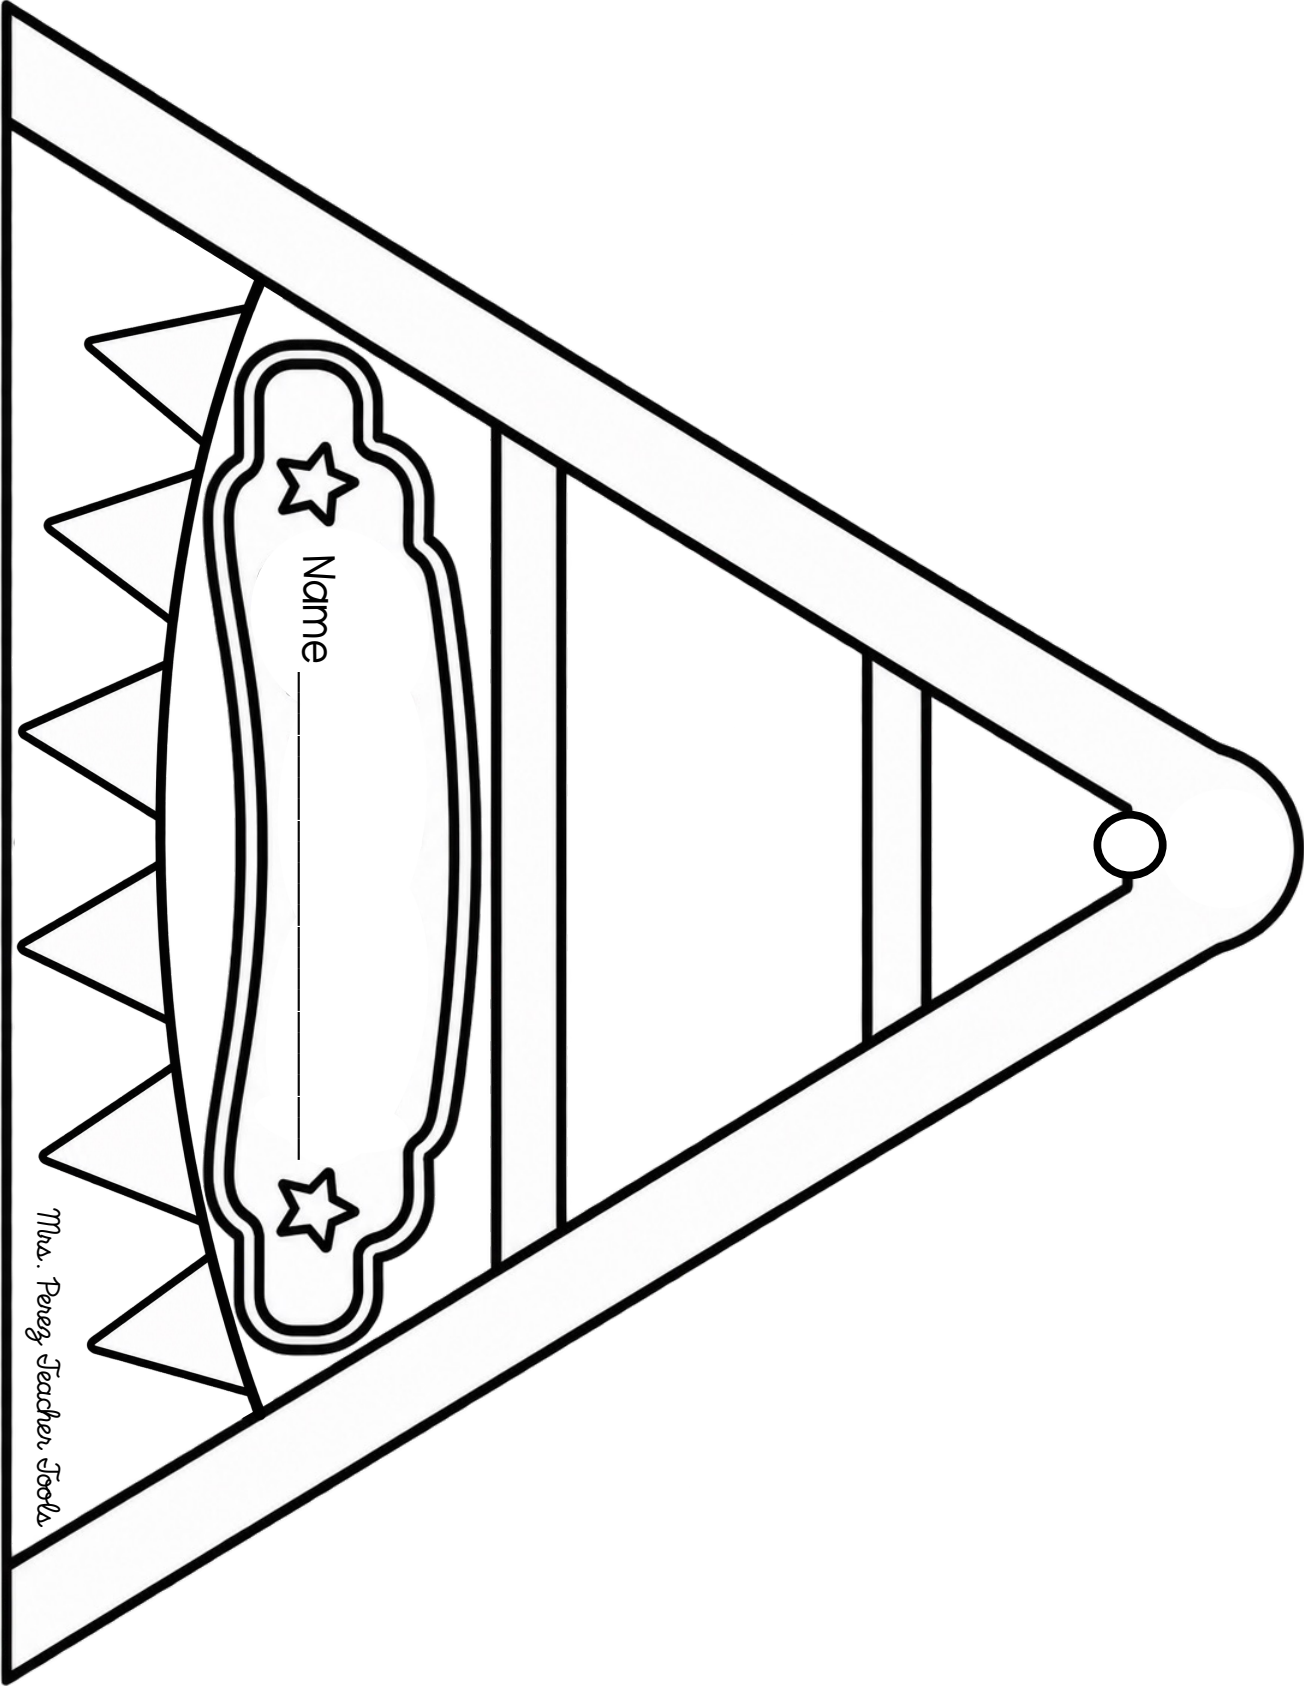

Ride the Doubles Ferris Wheel!

Write a doubles fact. Then add 1 to one addend to make a doubles +1 fact.
Repeat with a new doubles fact.
